

## Solar System Project: Moving the NFBGA to the future and beyond

During this project, we will be using the representation of the solar system to set up discussion break out teams to promote an audience discussion during our convention this year. Each convention attendee will be given a card that has the name of one solar system planet, star or Satellite, along with a adjective that will be used to describe each one. We will then divide up the audience into teams using each group of planets, stars and satellites. Once the groups are set up, each team will use their adjective description to come up with ideas that can be used to move the Georgia Affiliate into the future and beyond.

### Solar System (Planets, Stars and Satellites)

#### Team Captains

Adjective descriptions for each:

- Earth

Captain: Mr. Anil Lewis
